

ACCENTUALIZER and HDCR

ACCENTUALIZER makes pictures look more real by enhancing shade, sharpness, and gloss, to make pictures clearer. The HDCR function corrects blurred images caused by room lighting or outside light sources and creates an effect similar to increasing contrast resulting in clear images even in bright rooms.

MHL® connectivity

The projectors' HDMI2 input terminal supports the MHL (Mobile High-Definition Link). This feature allows you to mirror the screen of your MHL-enabled smartphone / tablet on a projected screen.

10000:1 High Contrast Ratio

Perfect fit

Equipped with Perfect fit with which the position of four corners and four sides of a projected image can be adjusted. With the remote controller at hand, you can quickly correct the distorted image such as pincushion or barrel.

Image Optimizer

Equipped with IMAGE OPTIMIZER, Hitachi's original function that maintains visibility of an image through automatic image correction in accordance with lamp consumption.

- This function may not work properly when HDCR/ACCENTUALIZER is ON.

Saver Mode

This feature developed by Hitachi, based on ImageCare® technology, reduces the lamp brightness and power consumption, resulting in considerable energy savings. The saver mode automatically activates when the projected image does not change in the preset time (1 to 30 minutes). You can also activate the saver mode manually with the remote controller.

Intelligent Eco Mode

This feature developed by Hitachi, based on ImageCare® technology, automatically changes the lamp brightness according to the input signal level. The lamp brightness is reduced when a darker image is projected, and returns to normal when a brighter image is projected, eliminating unnecessary energy consumption from the lamp.

MIC Input*¹ and 16W Internal Speaker

The projectors are equipped with a microphone input, so you can use the microphone system, even when the projector is in standby.*² These projectors also have a built-in 16watt high power speaker.

- *1 No MIC input terminal on CP-X301N, CP-EX251N, and CP-EW301N.
- *2 Not available while the STANDBY MODE is set to SAVING.

Easy Schedule Setting

You can schedule routine and special projector events, including power on, power off, input selection and other settings.

Other Useful Features

- Auto Vertical Keystone Correction
- Horizontal Keystone Correction
- PC-less Presentation
- USB Display
- Compatible with AMX Device Discovery
- Compatible with Crestron Room View®
- Network Bridge
- Auto Eco Mode
- Audio Pass Through
- Direct Power On/Off
- MyScreen
- My Button
- My Memory
- Closed Caption
- Security Pin Lock System

Network Function / Capability

Wireless Capability (Option)

The projector is capable of a wireless network with the optional USB wireless adapter that supports IEEE802.11b/g/n. You can control the projector with a computer via the network, and also project the screen of the computer on which the LiveViewer software is installed.

Multi Projector*¹

You can project the same image from up to 12*² projectors simultaneously. This is useful for meetings and lectures in large venues where a single screen would not be sufficient.

Moderator Control Mode*¹

Setting one computer from the multiple computers (up to 50*³) that are connected to the projector as the moderator (host) makes it possible for the moderator to project from all the computers (clients).

Projector Quick Connection

You can project images, documents, photos from a tablet or a smartphone on which Projector Quick Connection, the dedicated online application software developed by Hitachi, has been installed. The software allows you to control the projector with the devices.

* See the Hitachi website for details.
http://www.hitachi.co.jp/proj/en/apps/pj_connection.html

Projector Monitoring and Control from a Remote Location

Hitachi's Projector Management Software (PJMan) gives you the ability to control, diagnose and manage (monitor the status including power, lamp hours, and temperature and air filter conditions) a single or group of Hitachi projectors.

E-mail Alerts

E-mail notification is sent for routine maintenance and error conditions.
